- 14 November 2023
- December: No session due to I/ITSEC

**Hybrid sessions (in-person attendance and virtual participation via MS TEAMS)**

**Time: 1100 – 1200 EST**

**Monitor <https://sam.gov> for updates and RSVP instructions for each session.**

# Next PALT Session Information

- ACC-Orlando will host a hybrid PALT Update Session on 12 September 2023 at 1100-1200.
- To attend this PALT Update Session, individuals must register in advance via the notification located on the SAM.gov website.
- Registration for the 12 September PALT Update Session opens on 9 August 2023.
- You may submit questions in advance using a link provided in SAM.gov.
- The link for registration and submitting questions will close on 3 September 2023.
- **We ask you to pose a specific question, vice simply listing a program acronym or name.** This facilitates ACC-ORL providing focused, accurate answers. We will first address the questions we receive in advance, then open the floor for questions.

| <p><b>Aerial Target Systems 3 (ATS 3)</b></p> <p>The Aerial Target Systems support Army readiness and multi-domain operations through development, acquisition, operation and modernization of aerial targets. Multi-spectral Aerial Targets include realistic surrogates and actual high performance threat aircraft. Current and emerging weapons systems require test, evaluation, and training using threat representative aerial targets to assess weapons systems effectiveness in the operational environment.</p> | <p>PM CT2 is pursuing a follow-on contract to the Aerial Target Systems 2 (ATS 2) IDIQ. This follow-on effort is required to provide uninterrupted threat procurement and development. Currently, ATS 2 IDIQ is the sole acquisition vehicle procuring the new MQM-185 to meet emerging customer requirements. It is also used for key developments related to Aerial Threats. ATS 3 will provide for a seamless continuation of support.</p> | <p>The current ATS 2 contract expired in MAY 23.</p> <p>Threat Systems Management Office (TSMO) requires back-stop coverage for unplanned Aerial Threat needs (Groups 1 – 5) that would otherwise prohibit execution of customer and congressional funds.</p> | <p>SSN W900KK-23-R-ATS3</p> <p>Draft RFP – 4Q FY23</p> <p>Final RFP – 4Q FY23</p> <p>Target Award – 2Q FY24</p> |

| <p><b>Opposing Forces Mechanized Vehicle Replacement (OMVR)</b></p> <p>The OMVR will consist of a common Army tracked platform that uses modular visual modifications (VISMODs). This capability will allow the Opposing Forces to replicate five of the six warfighting functions. This replication will train Army units to synchronize all ISR assets available to the BCT, present threat representative tracked/mechanized vehicles and formations to the RTU across the depth and breadth of the training area and provide the OPFOR for the Army with a sustainable system that is safe for Soldiers to operate and maintain.</p> | <p>PM CT2 is pursuing a contract for modular VISMODs on a common Army tracked platform that will challenge the training units through replication of visual, thermal, electromagnetic, and aural signatures. This contract will provide research, development, testing and fabrication of VISMODs in addition to providing support for the preparation of host chassis to be reset and prepped for VISMODS and integrated into the CTCs for FY25 award.</p> | <p>BFVS Cascade Plan slippage could negatively affect prototype and design effort, as well as delivery to CTCs. TT PEG is partially funded. EE PEG is fully unfunded.</p> | <p>ACC-Orlando OMVR Request for Information (RFI) released 02 FEB 23; responses received 24 FEB 23.<br/><b>SAM.gov Notice ID</b><br/>PANORL23P0000000187</p> <p>A subsequent RFI went out under the TREX II (OTA) consortium; White Papers received 6 MAR 23</p> <p>Draft RFS – 1Q FY24</p> <p>Final RFS – 2Q FY24</p> |

# GENERAL INFORMATION

## ✓ Federal Register Item of Interest to Small Businesses

- DoD is seeking public input on improving the timeliness of payments to defense subcontractors.
- The request for feedback was published on 14 July 2023 in the Federal Register, and stems from a Defense Contract Finance Study, which found that defense subcontractors and suppliers generally do not receive favorable cash flow benefits as consistently or to the same extent enjoyed by defense prime contractors.
- Input on this matter is solicited from interested parties, including current prime contractors, subcontractors, suppliers, or vendors, and potential new entrants. This is a great opportunity for small businesses to have their voices heard!
- Interested parties are encouraged to submit their comments within 60 days (by 12 September 2023) via the Federal eRulemaking Portal: <https://www.regulations.gov/docket/DARS-2022-0012/document>

# GENERAL INFORMATION

## ✓ Court of Federal Claims Decision: SAM Registration Lapse

- U.S. Court of Federal Claims (COFC) recently granted a preliminary injunction in **Myriddian, LLC v. U.S.**, No. 23-443 (Fed. Cl. May 23, 2023) staying performance of a contract solicited by the Department of Health and Human Services (HHS).
- The solicitation included **FAR provision 52.204-7 (System for Award Management)**, which reads, *“an Offeror is required to be registered in SAM when submitting an offer or quote, and shall continue to be registered until time of award, during performance, and through final payment of any contract, basic agreement, basic ordering agreement, or blanket purchasing agreement resulting from this solicitation.”*
- The awardee had an active SAM registration at the time it submitted the proposal to the Government. However, the awardee’s SAM registration expired for 17 days during proposal evaluations. However, the awardee renewed it’s SAM registration prior to contract award. The protest was filed due to the awardee’s lapse in SAM registration.
- **The Court found that the plain language of FAR provision 52.204-7 requires that the registration be maintained “continuously” from submission of offer through final invoice.**
