MANOSCAN HRM WORKSTATION WITH CART
(Part # 47177)

Description: The High Resolution Manometry System is a piece of equipment used in many Gastrointestinal Clinics for motility evaluation. We are currently referring patients downtown. Manometry involves the placement of a catheter either orally or rectally. The specialized manometry catheters have pressure sensors that measure the motility of either the esophagus or the rectum. This allows the doctor to diagnose if a patient has dysmotility, or problems affecting either area. Dysmotility can make it difficult or impossible to swallow food or cause constipation. This is a brand name requirement.

Unless determined otherwise, the vendor will provide the following:

1. Conduct Installation and Onsite training for manometry and PH testing
2. The Manoscan HRM Workstation with Cart (47177) must include:
 - 2.1. Hardware
 - Cart part #FGS-8039
 - 3282 Calibration Set Up Modular Cart part #3282
 - Modular Cart Accessory Kit part #3283
 - GIFD WS PC WIN 10 With SW part #FGS-0684
 - Manoscan A120 Acquisition Mod part #FGS-4374
 - Manoscan Z A200 part #4189
 - A120 Power Cord-SJT Jacket part #WIR-0106-01
 - 2.2. Software
 - Manoscan V3.0 Software Kit part #FGS-0571
 - Software Manoview ESO V3.3 part #FGS-0628
 - Manoview AR V3.0 Software Kit part #FGS-8030
 - 2.3. Catheters
 - Manoscan ESO Z Cath part #3890
 - Manoscan AR Cath Reg part #2192
 - 2.4. Manoshield AR bx of 10 x 10 part #MSS-3599
3. **Qualifications/Certifications:** N/A.

NOTE:

Mandatory entries: Specifications, Installation (removal, clean up daily, patch/paint, etc),
Warranty, Period of Performance (60 days after contract is signed), Shipping
