Throughout the de-installation processes work crews will utilize hand tools, battery operated tools, corded power tools, gas powered saws and generators, welding equipment, and oxyacetylene torches. All tools are to be utilized in accordance with manufacturer's specifications. Torch cutting will be performed in accordance with site specific requirements for burn permits, fire watch, etc. Power generating equipment may either be diesel or gasoline fueled. When powered equipment of this nature is utilized, no more than 5 gallons of fuel will be stored onsite (separate from the equipment's onboard tank) to minimize spill potential. When limited quantities of these typical construction items are present, special environmental regulations are not required. Site surveys are performed prior to installation/de-installation in which environmentally sensitive areas such as storm water inlets, drainage swales, etc. are located. In the event these items are near our work areas specialized precautions will be utilized to prevent any jobsite runoff from entering these elements. TYAD may perform (in conjunction with site specific authority having jurisdiction) diking, damming, and filtering accordingly to maintain appropriate level of protection as deemed necessary on a site-specific basis.

AMC-LEVEL PROTEST PROGRAM (JUL 2012) ACC-APG TYD 5152.233-4001

If you have complaints about this procurement, it is preferable that you first attempt to resolve those concerns with the responsible Contracting Officer. However, you can also protest to Headquarters, AMC. the same time periods, as if filed at the GAO. The AMC protest decision goal is to resolve protests within 20 working days from filing. To be timely, protests must be filed within the periods specified in FAR 33.103. Send protests (other than protests to the Contracting Officer) to:

Headquarters U.S. Army Materiel Command
Office of Command Counsel
