Unlisted classifications needed for work not included in the scope of the classifications listed may be added only as provided in the labor standards contract (29CFR 5.5 (a) (1) (ii)).

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for each type(s) of construction in the area covered by the determination. The classifications are listed in an order of "identifiers" that indicate whether the rate is a union rate (current union negotiated rate), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier in dotted lines beginning with characters other than "UAVG" denotes that the union classification and prevailing for that classification in the survey. PLUM0198-005 07/01/2014. PLUM is an abbreviation for the union which prevailed in the survey for this classification, which in this example would be Plumbers Local 0198. The 005 in the example, is an internal number used in the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example

2014.

Union prevailing wage rates are updated to reflect changes in the collective bargaining agreement (CB this classification and rate.

Survey Rate Identifiers

Classifications listed under the "SU" identifier no one rate prevailed for this classification in the published rate is derived by computing a weighted rate based on all the rates reported in the survey classification. As this weighted average rate includes rates reported in the survey, it may include both non-union rates. Example: SULA2012-007 5/13/2014. the rates are survey rates based on a weighted average calculation of rates and are not majority rates. L the State of Louisiana. 2012 is the year of survey these classifications and rates are based. The next in the example, is an internal number used in production wage determination. 5/13/2014 indicates the survey date for the classifications and rates under that

Survey wage rates are not updated and remain in effect until a new survey is conducted.

Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier that no single majority rate prevailed for those classifications; however, 100% of the data reported for those classifications was union data. EXAMPLE: UAVG-OH-008/29/2014. UAVG indicates that the rate is a weighted average rate. OH indicates the state. The next number in the example, is an internal number used in production wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current

negotiated/CBA rate of the union locals from which based.
