MEMORANDUM FOR All U.S. Army Units

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

1. Scope: This memorandum constitutes an Airworthiness Release (AWR) in accordance with (IAW) Army Regulation (AR) 70-62 for use of approved listed rescue equipment on the UH60L/M and HH-60M helicopters equipped with a rescue hoist. This AWR ensures safety compatibility with the host aircraft. This AWR does not ensure durability and performance of the subject equipment.
2. Validity: This AWR is terminated on **31 Jan 25**, changes in configuration of the subject equipment, or issuance of a later AWR, whichever occurs first.
3. Appendices: This memorandum and Appendix A will be carried in the logbook, and a complete AWR copy with all appendices shall be kept in the aircraft historical record file.

Appendix A: Restrictions and Operating Information
Appendix B: Configuration and Installation Detail
Appendix C: Inspections, Maintenance, and Logbook Instructions
Appendix D: Reference List

4. The point of contact (POC) is Ms. Ashleigh Lynch, 256-876-5142, ashleigh.t.lynch.civ@army.mil. Alternate POC is Mr. Will Mason (Contractor, IronMountain Solutions, Inc.), DSN 312-897-0083, commercial 256-313-0083, william.w.mason4.ctr@army.mil or usarmy.redstone.ccdc-avmc.mbx.amr-au-tts@army.mil.

- 4 Encls
1. Addendum, to SOF
 2. Brochure – 2UP Device
 3. Owner's Manual Quick Strop
 4. ARV-QC

for KEITH R. DARROW
Director for Airworthiness
Systems Readiness Directorate

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

Appendix A. Restrictions and Operating Information:

1. Operate the UH-60L/M and HH-60M IAW the Operator's Manual (see D.1, or D.3), as appropriate, except as modified by this AWR.

WARNING

Dynamic rollout occurs when the rescue device bypasses the hook gate keeper and separates from the hook assembly. Failure to ensure the locking mechanism remains in the locked position on the rescue hoist hook assembly or failure to maintain positive control of cable slack may result in a dynamic rollout of the rescue device, which can lead to serious injury or death of personnel.

Ensure the patient is properly secured in the appropriate rescue equipment listed in Appendix B prior to hoisting to the aircraft. Failure to properly secure patient can result in the patient falling from the rescue equipment causing severe injury or loss of life.

2. Hoist operations shall be conducted IAW UH-60 Series Aircrew Training Module, Task 2060 (see D.7), the Army Aviation Rescue Hoist Standard Operating Procedure (SOP) (see D.13) and the H-60 Rescue Hoist Training Support Package (TSP). The TSP is available at the Directorate of Training and Doctrine Flight Training Branch: <https://intranet.tradoc.army.mil/sites/usaacedotd/TrainingDivision/FlightTrainingBranch/SitePages/Home.aspx>.
3. The 2UP Hoist Assist Device shall be marked with P/N "2UP-510D" to ensure it is not susceptible to dynamic rollout with any hook listed in the Addendum (see D.9). All other versions of the 2UP Hoist Assist Device are not approved for use.
4. The AMTC Cable Splice and Zephyr Quick Splice systems are for emergency use only and are restricted to a 500-pound load limit.
5. During training, any anomalies encountered by smaller sized aircrew operating the AMTC Cable Splice and Zephyr Quick Splice systems shall be reported to the AWR POC.
6. The main hook body on the 410 and 414 D-Lock series shall be used as the loading point for all Human External Cargo. No more than 25 kilograms / 55 pounds shall be placed in the utility eye during hoist operation.

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

Appendix B. Configuration and Installation Detail:

1. The basic UH-60L/M and HH-60M helicopter is defined IAW the Operator's Manual (see D.1, or D.3), with exceptions as noted within this AWR.
2. The following equipment (Table 1) is compatible with all current existing AWRs:

Table 1

Item Description	NSN	P/N
ARV-QC-M (Air Rescue Vest)	N/A	ARV-QC-M
Forest Penetrator	4240-00-199-7353	K26-1000-9
Forest Penetrator	4240-01-500-8115	K26-1000-105
SKED Complete Rescue System**	6530-01-301-0796	SK-800
SKED Basic Rescue System**	6530-01-260-1222	SK-200
Rescue Net	1670-01-172-3592	X-872-SF
Rescue Strop (Quick Strop)	4240-01-545-6722	214
Rescue Strop	1680-01-347-4946	216-1
#214-SAP Quick Strop	N/A	#214-SAP
#402 Hoistable Litter	6530-01-187-0104	402
#402-TI Hoistable Litter w/ Titanium Variant	6530-01-187-0104	402-TI
#420 Rescue Seat without Lift Insert**	4240-01-465-2302	420
#420 Rescue Seat with Lift Insert	4240-01-465-2302	420
495 Rescue Basket	1670-01-566-6578	495
495-L Rescue Basket *	N/A	495-L
499-B Rescue Basket	4240-01-250-0313	499-B
#404 Stokes Litter Basket	6530-01-338-6094	404
#406 Stokes Litter Basket	6530-01-397-0094	406
#406TI Stokes Litter Basket Titanium Variant	N/A	#406-TI
#190 Litter Hoist Slings **	1670-01-226-5300	190
#193-A Litter Hoisting Sling*	N/A	193-A
LSC Quick Splice	N/A	#197/#199
AMTC Cable Splice (Restricted to 500 pounds) *	N/A	AMTC-R2020/ R2031/R2049
Zephyr Quick Splice (restricted to 500 pounds)*	4030-01-600-6137 N/A	ZL-6000-3/ ZL-6000-4
Steel "O" Ring*	N/A	2004* (Source List in Ref 8)
2UP Hoist Assist Device*	N/A	2UP-510D

*These items must be ordered directly from the manufacturer.

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

**These items are subject to possible rollout due to the size of the attachment eyelet. The Mil-Spec Hook (without pin), Slide-Lok, and Slide-Lok II Hooks require use of the P/N 2004 Steel Alloy "O" Ring as a preventative measure against dynamic rollout. The auto-locking hooks (Auto-Lok, D-Lok, and Mil-Lok) have no susceptibility to dynamic rollout.

NOTE

The subject equipment has no interface with the host helicopter other than physical connection to rescue hoist hook.

The Medic must ensure that the grounding cable does not get snagged/entangled on/with anything on the ground.

All Quick and Cable Splices are for Emergency Use Only.

3. The approved rescue hoists hooks are in the attached Rescue Hoist Hook Addendum. See Addendum for more information and pictures of these hooks.
4. The Forest Penetrator (NSN 4240-00-199-7353, P/N K26-1000-9) is mounted to the rescue hoist by the rescue hook passing through a lifting eyebolt. The Forest Penetrator is maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).
5. The Forest Penetrator (NSN 4240-01-500-8115, P/N K26-1000-105) is the same as the obsolete P/N K26-1000-9 it replaces, with the addition of a Fouling Preventer Assembly and full-length eyebolt. The Forest Penetrator is mounted to the rescue hoist by the rescue hook passing through a lifting eyebolt. The Forest Penetrator is maintained and operated IAW TO 14S6-3-1 (see D.6).
6. Deleted
7. The SKED Complete Rescue System (NSN 6530-01-301-0796, P/N SK-800) consists of the SKED Basic Rescue System (P/N SK-200), the Inflatable Flotation System, and the Oregon Spine Splint II. The SKED stretcher is mounted to the rescue hoist by the rescue hook passing through the large steel locking carabineer that passes the four ends of the equalizing straps. The SKED Complete Rescue System is maintained and operated IAW the Army Aviation Hoist SOP (see D.13).

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

8. The SKED Basic Rescue System (NSN 6530-01-260-1222, P/N SK-200) is mounted to the rescue hoist by the rescue hook passing through the large steel locking carabineer that passes the four ends of the equalizing straps. The SKED Basic Rescue System is maintained and operated IAW the Army Aviation Hoist SOP (see D.13).
9. The Rescue Net (NSN 1670-01-172-3592, P/N X-872-SF) is mounted to the rescue hoist by the rescue hook passing through the pickup ring. The Rescue Net is maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).
10. The Rescue Strop (NSN 1680-01-347-4946, P/N 216-1) is mounted to the rescue hoist through the rescue hook passing through the dual "V" rings. The Rescue Strop is maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).
11. The #420 Rescue Seat (NSN 4240-01-465-2302, P/N 420) is mounted to the rescue hoist through the rescue hook passing through the lifting eyelet. The Rescue Seat is maintained and operated IAW NAVAIR 13-1-6.5 (see D.5). The aluminum Rescue Seat Lift Insert, while not hindering the use of the #420 Rescue Seat, changes the geometry of the lifting connection point so that the seat is no longer susceptible to dynamic rollout.
12. The Rescue Basket (NSN 1670-01-566-6578, P/N#495 and #495-L) is mounted to the rescue hoist through the rescue hook passing through the lifting eyelet. The #495-L is recommended to be used with the internal rescue hoist due to the inverted lifting eye. The #495 and 495-L Rescue Basket is maintained and operated IAW NAVIR 13-1-6.5 (see D.5).
13. The Rescue Basket (NSN 4240-01-250-0313, P/N 499-B) is mounted to the rescue hoist through the rescue hook passing through the lifting eyes. The Rescue Basket is maintained and operated IAW NAVAIR 13-1-6.5 using the P/N 495 maintenance information (see D.5).
14. Deleted
15. Life Savings System Corp, Rescue Strop (Quick Strop), P/N #214 and LSC #214-SAP is mounted to the rescue hoist through the rescue hook passing through the "V" rings. The Rescue Strop is maintained and operated IAW Owner's Manual Quick Strop (see D.12).
16. The Lifesaving Systems Corp (LSC) #404 / #406 / #406 TI Stokes Litter Baskets and #190 / #193-A Slings are maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

17. The Lifesaving Systems Corp (LSC) #402 / #402-TI Hoistable Litter (also known as MEDEVAC Litter) are maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).

18. The Steel "O" Ring P/N 2004 (also known as 3-4 Ring to emphasize the inside/outside diameter, or a Multiple Attachment Point (MAP) Ring) Authorized vendors are in the Addendum to SOF message (see D.9).

19. The Air Rescue Systems 2UP Hoist Assist Device, stamped with 2UP-510D, is the only approved version for use. All other 2UP Hoist Assist Devices are not approved due to susceptibility of dynamic roll out. The 2UP Hoist Assist Device shall be maintained IAW the 2UP Brochure 2015 (see D.8).

20. The Air Rescue System (ARS), ARS ARV-QC-M. The ARV-QC Vest shall be maintained IAW the Product Manual current version (see D.10).

21. The Lifesaving Systems Corp (LSC), #F-750-194 OM, LSC #197/199 Quick Splices. The Quick Splices shall be maintained IAW the Owner's Manual Quick Splices #194, #197 & #199 current version (see D.11).

22. Capewell, Aerial Machine and Tool Corp. Rescue Hoist Cable Splice, AMTC-R2020/R2031/2049 Cable Splice are maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).

23. Zephyr International LLC, Quick Splice, ZL-6000-3/ZL-6000-4, Quick Splice are maintained and operated IAW NAVAIR 13-1-6.5 (see D.5).

24. The logistical POC for rescue hoist equipment is Mr. Michael Brooks, DSN 897-1204 or commercial (256) 313-1204, michael.w.brooks28.civ@army.mil.

SUBJECT: AWR for Rescue Hoist Equipment on UH-60L/M and HH-60M Helicopters (AWR 980)

Appendix C. Inspections, Maintenance, and Logbook Instructions:

1. The subject equipment shall be inspected and maintained IAW all applicable maintenance manuals and associated messages.
2. Any/all logistics support required for such equipment/system installation must be established and maintained by the operating unit with appropriate, locally established, support activities. Parts needed for this modification may not be available in the supply system. Your activity/facility must locally procure/manufacture the modification parts (plus any additional spare parts). This AWR is not authorization to procure any material or sources "Sole Source."
3. Unit Commanders are responsible for training on operation of subject equipment and any aircraft-unique training required as a result of subject equipment installation.
4. In the event any operating limits established by this release are exceeded, in addition to the normal entry on Department of the Army (DA) Form 2408-13-1, appropriate inspections for security and condition of modifications shall be performed prior to next flight. Any incident or malfunction of the aircraft suspected of being related to these configuration modifications shall be reported immediately to the POC.
5. When not in use, the subject equipment shall be stowed and secured IAW the appropriate Operator's Manual (see D.1, or D.3), Chapter 6, Section VI.
6. Aircraft Logbook Entries:
 - a. In accordance with DA Pamphlet 738-751, the following entry shall be made on the DA Form 2408-13-1 and shall be perpetuated on each form during the period of installation or until superseded by another AWR, or until reason for limitation is removed. Any recurring maintenance action may be entered on the DA Form 2408-18. Enter the required action, frequency, when due, and AWR number on the DA Form 2408-18. Place a circled "X" in the Status block. In the Faults/Remarks block, make the following entry: "Operate IAW AWR 980, dated 20 Jan 23."
 - b. For Army Materiel Status System (AMSS) or DA Form 1352 reporting purposes, the above write-ups shall not cause the aircraft to be reported as Partially Mission Capable (PMC). Aircraft which are nonstandard configured and operating under this release may be reported as Fully Mission Capable (FMC).
 - c. The aircraft DA Form 2408-15 shall be annotated to cite this AWR by subject and date. The 2408-15 shall be annotated to reflect temporary installations as well as permanent changes to configuration.
