**Responses to Vendor Questions**

**1 May 2023**

---

**Q:** Regarding the trash and disposal, we understand the risk to debris and aircraft intake. Is there a sealed container we can rent or have brought on base, or should we keep all waste paper in the vehicle and transport it off site upon completion?

**A:** **The contractor shall provide a solution to remove any waste generated off site as to protect all aircraft ramp areas.**

**Q:** Will there be a lift provided for on base use, or should we prepare to rent one locally?

**A:** **Contractor shall provide their own equipment.**

**Q:** Have you all had any vinyl work like this done before? If so, were the graphics similar in size and may we ask what the award amount was?

**A:** **To my knowledge we have not done anything similar in the past. Several other AF installations have. We originally got the idea from Phoenix Sky Harbor.**
