

## **QUESTIONS AND ANSWERS FOR SOLICITATION**

### **Siemens Fire Alarm Repair - Minot AFB, ND**

#### **FA452823BM0001**

Q1. Looking through the scope of work, I have a person that can do Siemens but Siemens is Proprietary. Are you able to disclose how many bases there are? All of the single points have to communicate with each other and that might take a lot of work not described in the Scope of Work.

A1. All devices must communicate to the main control panel on site and be operational, as per the Statement of Work the repairs are at three different sites. Repair requirements maybe different at all three sites. Distance from base is depicted in the Statement of Work, Appendix I
