16. REMARKS (Continued)**1. Unlimited Rights Data**

The rights of the government to use, disclose, reproduce, prepare derivative works, distribute copies to the public, and perform publicly and display publicly, in any manner and for any purpose, and to have or permit others to do so. The government acquires unlimited rights in the following data except for copyrighted works:

Advertisements

- Data first produced in the performance of a contract (except to the extent the data constitute minor modifications to data that are limited rights data or restricted computer software).
- Form, fit, and function data delivered under contract.
- Data (except as may be included with restricted computer software) that constitute manuals or instructional and training material for installation, operation, or routine maintenance and repair of items, components, or processes delivered or furnished for use under a contract.
- All other data delivered under the contract other than limited rights data or restricted computer software

2. Limited Rights Data

This right enables a contractor to protect qualifying limited rights data and restricted computer software by withholding the data from the government and instead delivering form, fit, and function data. If a contractor has funded the development of an item completely at private expense, then he may limit the government's use of technical data using limited license rights, or restrict the government's use using restricted license rights.

- Limited Rights: means the government may use the data within the government but not release the technical data outside of the government (not even to support contractors), except if necessary for emergency repair or overhaul, and may not use the data for manufacturing additional quantities of the item.
- Restricted Rights: means the government may only run the software on one computer at a time, may make only the minimum copies needed for backup, but may make modifications to the software. The software may not be released outside of the government except for emergency repair or overhaul

3. Copyrighted Data

Copyright data is information that is owned by a contractor or the government. A contractor must obtain permission prior to asserting rights in any copyrighted work containing data first produced in the performance of a contract. However, contractors are normally authorized, without prior approval of the contracting officer, to assert copyright in technical or scientific articles based on or containing such data that is published in academic, technical or professional journals, symposia proceedings, and similar works.

4. Government Purpose Rights

Frequently, both government and private funds are used in development efforts. In these cases, the contractor may be entitled to offer technical data or computer software with government Purpose Rights (GPR). GPR is essentially a middle path unique to defense contracts that offers a way for contractors to exploit intellectual property commercially for a limited period of time while the government also gets immediate benefits.

5. Specifically Negotiated License Rights (SNLR)

This category pertains whenever the standard license arrangements are modified to the mutual agreement of the contractor and the government. In this case, the exact terms are spelled out in a specific license agreement unique to each application. [1]

a. Group I. Definition - Data which is not otherwise essential to the contractor's performance of the primary contracted effort (production, development, testing, and administration) but which is required by DD Form 1423.

Estimated Price - Costs to be included under Group I are those applicable to preparing and assembling the data item in conformance with Government requirements, and the administration and other expenses related to reproducing and delivering such data items to the Government.

b. Group II. Definition - Data which is essential to the performance of the primary contracted effort but the contractor is required to perform additional work to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, or quality of the data item.

Estimated Price - Costs to be included under Group II are those incurred over and above the cost of the essential data item without conforming to Government requirements, and the administrative and other expenses related to reproducing and delivering such data item to the Government.

c. Group III. Definition - Data which the contractor must develop for his internal use in performance of the primary contracted effort and does not require any substantial change to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, and quality of the data item.

Estimated Price - Costs to be included under Group III are the administrative and other expenses related to reproducing and delivering such data item to the Government.

d. Group IV. Definition - Data which is developed by the contractor as part of his normal operating procedures and his effort in supplying these data to the Government is minimal.

Estimated Price - Group IV items should normally be shown on the DD Form 1423 at no cost.

Item 18. For each data item, enter an amount equal to that portion of the total price which is estimated to be attributable to the production or development for the Government of that item of data. These estimated data prices shall be developed only from those costs which will be incurred as a direct result of the requirement to supply the data, over and above those costs which would otherwise be incurred in performance of the contract if no data were required. The estimated data prices shall not include any amount for rights in data. The Government's right to use the data shall be governed by the pertinent provisions of the contract.
