

## **Description of Requirement for Expeditionary Barrier Units**

**REQUIREMENT:** The Geotechnical and Structures Lab (GSL) has a need for the following expeditionary barrier units:

- QTY: 17 - Expeditionary barrier units with dimensions of 9'x3'6"x10'5" (Height x Width x Length)
- QTY: 60 - Expeditionary barrier units with dimensions of 2'x2'x10' (Height x Width x Length)

**GENERAL SPECIFICATIONS:** Geotextile-lined welded mesh barrier coated to ASTM A 856. All wire conforms to BS EN 10218-2:2012. Zinc-aluminum coatings are to BS EN 10244-2:2009, where appropriate. The geotextile fabric must be a heavy-duty, non-woven, permeable material in beige color.

**PRICING:** The contractor shall provide pricing per unit. Pricing must include shipping costs to delivery location.

**DELIVERY DATE REQUIREMENT:** 20 January 2023

**DELIVERY LOCATION:** Delivery address and POC are shown below. Deliveries are accepted Monday through Friday (0700-1530, excluding federal holidays, no deliveries after 1200 on Friday). Delivery times must be coordinated with POC at least 1 day prior to arrival.
