1. Unless otherwise quoted, wholesale rates will be based on the daily Oil Price Information Services (OPIS) rack rate using the Fresno, California, locality (unbranded rack average, cap at the rack and LCFS costs included) for gross carb ultra low sulfur distillate (Red-Dyed Diesel). OPIS rates are available through <http://www.opisnet.com>. It will be the offeror's responsibility to obtain and track OPIS pricing to ensure proper invoicing and provide the rack price for the day of delivery on each delivery ticket when delivered and on each subsequent invoice. For purposes of providing a quote, the wholesale rate of \$4.18 is considered an estimated with actual wholesale amounts applied to invoices throughout the performance of contract.

2. The mark-up rate (by dollars per gallon) is firm-fixed price for the base year and option years.
