MEMORANDUM FOR RECORD

FROM: AFCEC/CO  
139 Barnes Drive, STE 1  
Tyndall AFB, FL 32403-5319

SUBJECT: Generator Standardization, Single Manufacturer Selection

1. This memorandum serves as AFCEC/CO's official communication approving the selection of a single manufacturer for generators respective to the following installation(s):

<b>Installation:</b>	<b>Unit:</b>	<b>Manufacturer:</b>
Grand Forks AFB, ND	319 CES	Cummins
Seymour Johnson AFB, NC	4 CES	Cummins
Grissom ARB, IN	434 CES	Cummins

2. The comprehensive inventory analysis is to be repeated after five years from the date of this memorandum. The purpose of this secondary analysis is to document the installation's progress in standardizing generators, consider any changes in the decision facts, and confirm no external factors exist that may drive a reconsideration of the approved single manufacturer. Should the BCE determine that a change in single manufacturer is required, a new Memorandum of Request (MOR) and analysis will be accomplished.

3. Please direct any questions and/or concerns regarding implementation of this guidance to my POC, Bryan Muller, DSN 523-6291, [bryan.muller.1@us.af.mil](mailto:bryan.muller.1@us.af.mil) or to the AFCEC Reachback Center at [AFCEC.RBC@us.af.mil](mailto:AFCEC.RBC@us.af.mil).

JEFFREY R. KLEIN, Lt Col, USAF  
Deputy Director, Operations
