Evaluation Factors for Award

Addenda to FAR 52.212-2Evaluation - Commercial Items

Addendum to 52.212-2(a):Paragraph (a) is tailored as follows:

1.0 Basis for Contract Award. The Government intends to award one (1) Firm Fixed Price Requirements Contract to for this competitive Service-Disabled Veteran Owned Small Business (SDVOSB) Set-Aside acquisition. Award will be made to the technically acceptable Offeror with lowest evaluated price who is deemed responsible in accordance with FAR 9.104 and whose proposal conforms to the solicitation requirements. The solicitation requirements include all stated terms, conditions, representations, certifications, and all other information required by this solicitation. Unless specifically identified in your proposal, by submission of its offer, the Offeror accedes to all solicitation requirements, including terms and conditions, representations and certifications and technical requirements, in addition to those identified as evaluation factors or sub factors. Failure to meet a requirement may result in a proposal being determined ineligible for award.

This acquisition will be awarded as Firm Fixed Price (FFP), Indefinite Delivery/Requirements contract in which the Government will utilize the Lowest Price Technically Acceptable (LPTA) source selection procedures IAW FAR 15.101-2. Technical tradeoffs will not be made and no additional credit will be given for exceeding acceptability. The Government will consider, throughout the evaluation, the correction potential of any proposal. The judgement of such correction potential is within the sole discretion of the Government. If any aspect of an Offeror's proposal does not meet the Government's requirement, and is not considered correctable, the Offeror shall be ineligible for award.

It is the Government's intent to evaluate proposals and award contracts without discussions with Offerors (except clarifications as describe in FAR 15.306(a)). Therefore, the Offeror's initial proposal should contain the Offeror's best terms from a price and technical standpoint. However, the Government reserves the right to conduct discussions if the Contracting Officer (CO) later determines them to be necessary.

Evaluation Process. Offerors will be ranked from lowest to highest based on initial assessment of Total Evaluated Price (TEP), followed by a full evaluation of technical acceptability. Price analysis techniques will be utilized to determine price reasonableness.:

Price Factors

Price Evaluation. An offeror's proposed estimated price will be determined by multiplying the estimated quantities by the proposed unit price for each CLIN. The extended amount for each CLIN will be totaled to obtain the estimated total for each performance period. CLINs 0X08 and 0X12 are Not to Exceed (NTE) CLINs and are set by the Government; these amounts cannot be changed and the total NTE price will be evaluated as a part of the Total Evaluated Price. The estimated total for the basic performance period will then be added to the estimated total for each ordering period to obtain the Total Evaluated Price. The Total Evaluated Price consists of all ordering periods.

The contract will include five (5) ordering periods with the potential to extend the contracts an additional 6 months beyond the awarded contract performance IA W FAR Clause 52.217-8, Option to Extend Services which is also included in the evaluation of prices. The price for that period will be determined based on the unit prices proposed for the current period of performance and will be evaluated at time of award. In the event the Government requires continued performance, the Government's evaluation of prices proposed will be considered fair and reasonable as applied to an extension of services. Should an extension of services be required rates will be adjusted only as result of revisions to applicable prevailing Department of Labor wage rates.

1.1 Technical Evaluation. If the Government receives three (3) or fewer proposals all proposals will be evaluated for Technical Acceptability. If the Government receives more than three (3) proposals the Government will only select the three (3) lowest priced proposals and then evaluate them for Technical Acceptability. The Government reserves the right to evaluate additional proposals for technical acceptability if in the Government's best interest. If additional proposals are evaluated for technical acceptability they will be selected in the order of total evaluated price.

1.2 Acceptability Ratings. The evaluation factors listed below will be evaluated and receive one of the following ratings:

- (i) Acceptable - The proposal clearly meets the minimum requirements of the solicitation.
- (ii) Unacceptable - The proposal does not clearly meet the minimum requirements of the solicitation.

1.3 Evaluation of Factors. Offerors are advised that their submission should be their best effort. Only technically acceptable proposals, either initially or as a result of discussions, are eligible for award. If award is made without discussions, proposal revisions will not be permitted. The Government will evaluate the proposals selected above for technical acceptability on an Acceptable/Unacceptable basis. For the technical proposal to be rated as "Acceptable", all technical factors and sub factors must be rated acceptable. If any technical factor or sub factor is rated "Unacceptable" the overall proposal will be rated as "Unacceptable". The technical proposal will be evaluated for the following technical factors and subfactors:

(A) Technical Factor# 1- Management Plan.

Standard: The Offeror shall submit a "management plan" that illustrates the corporate philosophy and management approach to demonstrate evidence of sound organization, appropriate manning and qualifications proposed, and performance management processes to successfully accomplish tasks delineated in the PWS. The plan should provide evidence of knowledge and capability of performing HVAC Water Chemical Treatment services as defined in the solicitation. At a minimum, the plan should:

- i. Demonstrate the capability to provide local off base storage that allows for immediate access, use, delivery and storage of water treatment chemicals.

- ii. Include a list of all specific chemicals used to treat the specified systems to show quantity and type of chemicals to be stocked on hand (and/or just-in-time) for immediate delivery and application as required to ensure the systems are balanced to meet or exceed manufacturer's recommendations.
- iii. Approach for structuring, staffing (to include a proposed manning mix of personnel), retaining personnel, and utilization of key personnel to plan, control, and direct the labor force to meet the requirements of the PWS. The approach shall include an organizational chart with definition of roles and responsibilities of key operating personnel and staffing levels depicting various job classifications (including supervision).
- iv. Provide mitigating strategies and processes designed to prevent and proactively identify and forecast potential risks that could have an adverse impact to schedule or performance.
- v. Identify phase-in activities (to include a timeline with rationale addressing the start and completion of staffing, training, and equipment/supplies acquisition) designed to provide seamless continuity of services without interruption or degradation of services by contract start date.

The standard has been met when: The offeror adequately demonstrates a sound, comprehensive, realistic, effective, and efficient management approach to provide and manage the appropriate workforce to achieve consistent, efficient, and uninterrupted operations in accordance with the requirements of the PWS.

(B) Technical Factor# 2- Quality Control Plan

Standard: The Offeror shall submit a "quality control plan" (QCP) with a complete written system for identifying and correcting deficiencies and degradation in the quality of services before the level of performance becomes unacceptable. At a minimum, the plan should specifically address contract requirements and location (s) listed and provide the following:

- i. The plan shall address responsibilities for oversight of the QCP, functions associated with such oversight, and specify authority to coordinate with the COR and CO.
- ii. Describe the methodology to monitor deficiencies/complaints in relation to the performance standards. Describe the approach to inform employees of validated deficiencies/complaints, and a process to ensure that the deficiencies/complaints are corrected and eradicated.
- iii. Include samples of inspection forms, records, reports, and any other internal quality control methods tailored to the specific building(s) being serviced under the PWS.

The standard has been met when: The offeror adequately demonstrates a sound, comprehensive, realistic, effective, and efficient quality control approach to correct deficiencies and degradation of services to achieve consistent, efficient, and acceptable performance service levels in accordance with the requirements of the PWS. The strategies outlined in the plan are realistic to minimize the effects of deficiencies/complaints and designed to efficiently and effectively correct and prevent reoccurrence.

1.4 Reasonableness. The Government, using one (1) or more of the techniques defined in FAR 15.404-1, will determine if the lowest priced technically acceptable offer is reasonable and balanced. Unbalanced pricing exists when, despite an acceptable TEP, the price of one (1) or more contract line item(s) appears to be significantly overstated or understated as indicated by the application of price analysis techniques. An Offeror's proposal may be rejected if the Contracting Officer determines that the lack of balance poses an unacceptable risk to the Government.

2.0 Discussions. The Government intends to make an award without discussions. If discussions are to be conducted, the Government will establish a competitive range based on the ratings of each proposal against all evaluation criteria in the solicitation. The competitive range will consist of the most highly rated Offerors based on evaluation of all offers against all factors. The Government reserves the right to further limit the number of proposals in the competitive range to the greatest number that will permit an efficient competition among the most highly rated proposals. Prior to the establishment of the competitive range, and after the decision to conduct discussions has been made, the Government may enter into limited communications with Offerors whose inclusion or exclusion from the competitive range is uncertain. These communications are limited IAW FAR 15.306(b)(1). The Government will only enter discussions with those Offerors determined to be in the competitive range.

At the conclusion of discussions, each Offeror still within the competitive range shall be given an opportunity to submit a Final Proposal Revision (FPR) by a common cutoff date and time as established by the Contracting Officer. If, after discussion have begun, the Government determines that an Offeror's proposal should no longer be included in the competitive range, the proposal will be eliminated from consideration for award. This may occur at any time, even if all material issues have not been discussed or if the Offeror has not yet been afforded the opportunity to submit a proposal revision. Written notice of exclusion from the competitive range will be provided to unsuccessful Offerors.
