

**27 June 2022**  
**CONTRACTOR SCOPE OF WORK SYNOPSIS**  
**VA Medical Center Providence, RI**  
**New Mental Health Building – Phase 2**  
**PROJECT 650-347**

Contractor shall completely prepare site for building operations, including demolition and removal of existing structures/equipment, and furnish labor and materials and perform work for the Expansion and Renovation of Space for the New Mental Health Building Phase 2 Construction Project at the Providence Veterans Affairs Medical Center, Providence, Rhode Island as required by drawings and specifications and per the description herein.

This project shall include, but not be limited to general construction, alterations, civil site work, finishes, HVAC, electrical work, plumbing, fire alarm and suppression, security and other items as contained within the construction documents. Refer to contract documents (drawings and specifications) for complete details of project work.

As VAMC Providence is a 24/7 medical facility the contractor will be required to perform some work outside of VAMC Providence's normal working hours. VAMC Providence's normal working hours are 7:00am EST to 5:00pm EST. Refer to Specifications for limitations and requirements on work scheduling and off hours work.

After award, but prior to the start of any field work, the contractor shall contact the VA Project Manager to review proposed methods and plans for completion of work and to review infection control procedures, interim life safety procedures, above ceiling and wall penetration permits, hot work permits and the contractor's site-specific safety plan.

This Scope of Work is not considered to be a comprehensive description of work details for this project. All work shall be completed per approved plans and specifications.
