

Specifications and Requirements

MFR: Wintersteiger

P/N#: 8140-401-40

ITEM: Ski & Board Tuning Machine (Omega SBI 1x208-230v 60Hz)

Inline Stone / Belt Grinding Machine for Skis, Snowboards, and Cross-Country Skis

QTY: 1 each

CONFIGURATION:

Product - - Omega SBI

Voltage Version - - 1/N AC 208-220v – 60Hz

Stone 350mm - - 8570-0221-V04 Blue

Diamond - - 56-200-169 5x0, 6x0, 6 squared

Contact Wheel - - 40 Shore – Turquoise

Documentation Language - - English and French

FEATURES:

A 350mm wide stone and a 350mm wide belt allow for the best service for all kinds of equipment.

Versatility Combined with a Rugged Design:

- Stone and Belt grinding combined in one machine allow the complete scope of ski service on smallest footprint.
- Rapid switching from grinding stone to belt with a single action.

Easy and Ergonomic Operation:

- Store your 3 preferred programs on the "Easy Go" quick access buttons: Selecting the program by the push of a button.
- Quick and easy access with a color touch screen.
- Enough storage for over 100 grinding programs.
- Power saving operation with supported feed lift.

Economic Operation:

- By splitting the stone into halves you can apply two different structures at one time: After pre grinding you can apply the final structure without dressing.
- Huge structure variety due to stepless stone feed and dressing speeds. Space saving as machine can be placed against the wall.

Triple Wheel Feed System:

- The three-wheel feed system allows distribution of pressure specific to each equipment especially when grinding convex or concave bases.
