Contract #

Ironwolf Planer Series: 5XPM

Basic specifications and construction (Asphalt crushing/shredding/recycling and Concrete Milling). Fixed tooth road planer for skid steers up 130 hp.

GENERAL SPECIFICATIONS

The following items are required:

- The Planer head unit and all furnished accessories shall comply with all appropriate SAE and ISO regulations in effect at the time of manufacture
- Power Requirements Horsepower: Min 85HP
 - :Max 100 HP
- Hydraulic flow GPM: Min 35 gpm
 - Max: 45 gpm
- Carbide teeth on drum: 58
- Drum RPM: 130
- Cutting Depth: 0-4 in or greater
- Minimum operating weight: 3800 lbs
- Maximum ground pressure options:
 - ☐ Min 3,300
 - ☐ Max: 4,500
- Mechanical floating tilt system (tilt)
- Independent hydraulic skids control
- Mobile sides frame
- Enclosed /anti-dust machine body
- Working pressure control gauge
- Dimensions:
 - Cutting Width: 57.50 in
 - Overall Width: 68.75
 - Max Drum Diameter: 29.50 in
 - Height: 38 in
- Ride control/ride stabilizer

Options:

- Multiple tooth options

- Teeth for concrete
- Teeth for Asphalt
- Hydraulic floating tilt system (tilt)
 - For optimal results on uneven surfaces
- Hydraulic drive system
 - For accurate positioning over the work area
- Wiring adapters
 - Wiring interface to allow a plug and play coupling with the most popular skid steers

PERFORMANCE SPECIFICATIONS

The attachment must be capable of meeting minimum performance standards to meet the operating requirements:

- Minimum 130 horsepower
- Minimum Rated Operating weight: 3,800 lbs.
- Minimum SAE Rated Operating Capacity at 50% of the Tipping Load: 4,315 lbs. without counterweight
- Two-Speed hydraulic speeds (low/high range)
- Electric/Hydraulic controls
 - High-Flow and Standard Low-Flow Hydraulics
 - Hydraulic High Flow: minimum 40-45 GPM.
 - Hydraulic Standard Flow: minimum 30-35 GPM

Shipping Instructions

Please Contact delivery location POC 48hrs before delivery

SHIP TO: Customer will pick up
