*The estimated value of the proposed action is [REDACTED]*

**Requested surgical debrider handpieces features an ergonomically engineered handle that provides optimal balance and control when held traditionally (knee), dagger style (shoulder and hip), or pencil grip. This eliminates the fatigue associated with traditional barrel shaped styles.**

**3. Unique characteristics that limit availability to only one brand, with the reason no other supplies or services can be used:**

**Requested surgical de-brider handpieces are in addition to currently stocked handpieces. These are already in use and are consistent with currently used consumable stock blades. These are also consistent with currently owned control boxes that supply power to the shaver/ de-brider handpieces. To purchase another brand other than what was requested would expose the government to further expense to purchase the control boxes and purchase and stock different single use arthroscopic burs and blades. Current cleaning and sterilization procedures for these devices are already in place.**
