Section C: Justification for Soliciting from a Single Source or Brand Name

The recently completed 414th CTS MILCON project only provided full infrastructure for the internal proximity access control system. This was a governmental oversight as it only included the wiring, key pads and computer software but did not include the computers/card readers/cards and systems interface equipment. Brand new 42 square foot Top Secret Facility with over 30 doors individually segmented into separate access secure areas all installed and wired by the company "DKR".

Due to the original installation company "DKR" designed the original infrastructure, "DKR" has designed system that is directly compatible and integrated equipment to complete the system modification.

Additionally, "DKR" as the installation company has unique knowledge of the installed portions of the system that will preclude potentially tearing out and reinstalling new components. DKR has directly compatible equipment that has been tested with the installed system components.

Section D: Efforts to Obtain Competition

Market Research indicated no additional contractor or company for this service, and award to another contractor is likely to result in duplicate costs not expected to be recovered through competition.

Single Source Justification (Simplified Acquisition)

Section E: Steps to Preclude Future Single Source or Brand Name Awards

In the future, continual market research shall be performed for similar or like requirements to ascertain if other manufacturers are entering these specified markets that can meet the AFI and/or DoDI standards/requirements. Additional market research shall also be conducted to determine if there are other brands available for future similar or like requirements that will neither hinder the mission of the customer nor increase the cost/price for the government.

Section F: Contracting Officer's Determination
