

USMA Purchase Description

Arm Shields

Local Stock Number TR0126

6 December 2017

Our patented Dri-Kleen (Dress Shields Style #1165, Size 3) underarm shields are uniquely constructed with advanced materials and using advanced machinery.

There are 3 layers to the Dri-Kleen shields:

The top layer is a soft, absorbent taffeta fabric.

The mid layer is a special thermally bonded composition of nylon and polyurethane which makes for a dry cleanable yet waterproof barrier.

The third layer is a uniquely absorbent double napped 100% cotton featherdown with reactive.
