

Solicitation Questions & Answers

Program Title: Environmental Tank Testing BPA

Contracting Office: 436 CONS/PKA

Solicitation #: FA449723RENTT

Subject: Environmental Tank Testing

Summary of Site Visit (if applicable)

	<u>Question</u>	<u>Answer</u>
<input type="checkbox"/> + <input type="checkbox"/> -	1) What prevailing wage rate should we use for the bid? Is there a military standard for compliance testing? Usually, we would fall under the plumber/pipefitter category. Do you have a category preference?	The contractor must determine which prevailing wage rate(s) are suitable for the service requested. The military does not have a standard for compliance testing. The government does not have preference and would suggest the contractor select the categories that are most suitable for the service.
<input type="checkbox"/> + <input type="checkbox"/> -	2 If you could please clarify what company information is need again that would be great?	Offeror shall provide a copy of their (1) Delaware Contractor Certification for Vapor Recovery System Testing and (2) Delaware Certified UST Retrofit Contractors certification to accomplished tasks identified in the performance work statement. The above certification must be maintained for the life of the BPA. Offeror shall provide a capability statement that includes no more than five (5) of the most recent (within the last 5 years) and relevant (similar scope) contracts performed for Government agencies and commercial customers. The information submitted shall include the follow: 1. Customer/ Agency name: 2. Customer/ Agency point of contact: 3. Project Title: 4. Description of work (performed by the offeror): 5. Period of performance: 6. Contract dollar value:
<input type="checkbox"/> + <input type="checkbox"/> -	3) Also, just wanted to confirm the stage 2 has been decommissioned and is a balance system?	Yes, the Stage 2 vapor recovery systems have been properly decommissioned at the two locations (AAFES Shoppette and Gov't Service Station) where it was previously installed. Notifications were provided to DNREC IAW with the state regulations. All tank systems included in the service contract are balanced systems.
<input type="checkbox"/> + <input type="checkbox"/> -	4) Could you send copies of the tank registrations at your earliest convenience?	Please see attachment 4. Attached are the tank registrations for the two UST locations. The state of Delaware does not issue registration certificates for ASTs so I don't have anything to provide you with for the Gov't Service Station site. There was also a request for an Emergency Response Plan, which I've also attached. Pages 27-29 are placeholders for the site diagrams, but are not included due to the file size. Those can be provided upon request.
