

Downdraft Paint Booth and Paint Mix Room QnA

1. Is this a Full Downdraft with a Floor Pit Exhaust System, or is this a SIDE DOWNDRAFT with Exhaust on Either Side of Booth?

Answer: The paint booth we are requesting is a "Downdraft Booth". There are several versions of downdraft booths on the market currently that are acceptable if they meet the salient characteristics. Please only send "DOWNDRAFT Booths" we will not accept "CROSSFLOW" booth designs. See attachment 1 for Salient Characteristics.

2. What is total Dimension of Paint Booth, Exterior? What is dimension of Paint Mix Room?

Answer: The room in which the paint booth needs to be installed is 39' Long X 23' Wide. The new booth should be roughly 27' Long for the booth with a 7' mixing room on the back and roughly 12-14' wide.

3. Government should consider changes to CLIN payments structure.

Answer: The Government may consider changes to the CLIN structure once an awardee is determined.
