

PORTABLE TOILET RECOMPETE

QUESTIONS and ANSWERS

1. Is the air show awarded separately from the yearly contract? **On years we have an air show, (1,3,5 year as in the contract) it will be a modification to the existing contract option (different line of funding) on an as needed basis.**
2. Is the bid awarded on total dollar of the contract over the five years? or dollar amount over the first year? **This is a Base plus 4 (four) option year contract. This contract will be awarded based off total dollar value over 5 years.**
3. Delivery/ Pick-up timeline – I want to verify the 3-day staging period before and after the event, not a one-day limit? **This is correct for the Air Show**
4. The ancillary charges for the porta-potties (1100) comes out to 5 extra services, whereas, for the hand wash stations there are (90) or 6 extra services. Is there an extra trip/service required just for the hand-wash stations? Moreover, how many extra services will be required? **This is based on past performances. Handwash stations seem to run out quicker depending on the location.**
5. Is there a schedule or timeline for the extra services? **As needed. With it being so hard to get on and off the base during an Air Show past contractors have kept a truck and driver here all day both days to provide services as needed. Due to public safety if we have don't have the luxury of a large service window wait time to pump full units.**
6. Can we use 2 sided sinks and double them up? **Yes. We have used the two-sided units in the past.**
7. What is the approximate time the air show is over on Sunday? **Usually done by 4:30pm...but we have to wait for the crowd to disperse. Start pumping units by 5 and moving them by 5:30 or 6pm to clear for planes to leave. Move them all to the staging area.**
