MEMORANDUM FOR OC-ALC/OBC

FROM: OC-ALC/OBH

SUBJECT: Brand Name Justification for Commodities Field Training Detachment (FTD)
Workbenches

1. The OC-ALC/OBH Workforce Development Branch in conjunction with 76CMXG is establishing a civilian FTD to train new technicians in hands-on maintenance operations. The setup of this FTD will include the establishment of two classrooms and a shop area.
2. The CMXG FTD training shop area will need to include fourteen (14) workbenches to be utilized by students and the instructor to perform hands-on maintenance training. It is critical that the workbenches required to support this training initiative match the make and model used in the actual production environment within 76 CMXG.
3. The 76 CMXG Engineering Team assigned to this project has identified the workbenches utilized in their production areas. These workbenches are manufactured and installed by Stanley Black & Decker.
4. OC-ALC/OBH requests procurement of these workbenches not be competed due to the specific technical requirements and the need for these workbenches to match the CMXG production environment.
5. For additional information please contact [REDACTED]
