

## Questions and Answers

23 March 2023

**Question 1.** How many garbage cans are there and what does the X mean in front of the bag size?

**Answer:** A supply of 500 large trash bags and 1300 small trash bags should be sufficient for 3 weeks' worth of changing the trash every day. Divide those numbers by 21 and it will get you the approximate number trashcans with that approximation already being rounded up.

**Question 2.** What type of toilet paper dispensers are there and how many?

**Answer:** Type- reference picture below  
Quantity- 25

**Question 3.** What type of paper towel dispensers are there, how many and what size?

**Answer:** Type- reference pictures below  
Quantity- 10  
Size- reference pictures

**Question 4.** Is the square footage on the maps that were given correct to the best of your knowledge?

**Answer:** Square footage, less than the following number because not all interior spaces will be cleaned. Referenced attached floor plans.

Total Sq ft: 17,121 (approximate)
