SECTION 01
NARRATIVE**Replacement AHU-5****Mission Statement:**

The Replacement AHU-5 project scope includes administrative work areas, large and small conference rooms, private offices, breakout areas, and other support areas. Open office W220 and W209 is configured utilizing a mixture of existing workstations and new workstations sized at 7' x 8'. Open Office W298 is configured utilizing all new 7'x8' workstations and W203 is configured with new 8' x 8'-6" workstations. Due to the existing facility conditions, power poles shall be incorporated for power and data distribution of all workstations.

The private offices are configured with standard U-Shaped desks with a variety of storage options. The conference rooms have standard powered tables along with additional side seating as necessary. The collaboration rooms have been configured with a variety of soft seating options as well as standard table and chair configurations. Small break and printer areas have also been provided throughout the spaces with non-plumbed appliances and café style seating.

General Facility Description:

This renovation is located on the second floor of facility 10856. It will seat about ninety-two occupants comprised of open office and private offices. New ceiling, wall and floor finishes will be installed.

Applicable Design Manuals, Codes, Criteria:**Standards:**

- UFC 3-120-10 Interior Design, with Change 3
- UFC 4-010-01 DoD Minimum Antiterrorism Standards for Buildings
- UFGS Specifications
- ABA Accessibility Standard for Department of Defense Facilities, October 31, 2008
- Whole Building Design Guide
- National Institute of Building Sciences
- ANSI/BIFMA Safety and Performance Standards for Furniture
- AFMAN 32-1084 Facility Requirements, Facility Class 6 Administrative
- Air Force Corporate Facilities Standards

Design Intention:

The Furniture, Fixtures and Equipment (FF&E) will reflect the aesthetically pleasing surroundings through the harmonization of the materials, finishes and color palette. The facility shall be attractive and safe, provide materials that are low maintenance, durable, and timeless in style, while responsive to the end users' needs and function. The interiors will promote an appropriate professional image for the administrative and mentoring environment and still be receptive to the working environment which maximizes the units' mission.

Furnishings Analysis:

The criteria for the FF&E benefits both the facility needs, and user needs from a facility management and health prospective. The facility requires furnishings that respond to the demanding physical requirements of the constant utilization within this high-use facility environment. Of equal importance to the function of the furnishings is to provide proper ergonomic support which plays a key role in the satisfaction, well-being, and productivity of the personnel when furnishings are properly sized.

Furnishings that can be modified and repaired by on-site personnel with limited or no tools will be taken into consideration. All furnishings shall be analyzed with consideration based on cost, functional solution, ergonomic solution, sustainability, and technical and user requirements.

REPLACE AHU-5
WRIGHT PATTERSON AIR FORCE BASE, OHIO

SECTION 01
NARRATIVE**Sustainability:**

Furnishings shall be selected from manufacturers that utilize green manufacturing processes and produce products that are Green Guard Certified, with recycled content materials. When possible, furnishings shall be provided that achieve the "Cradle to Cradle" environmental status to reduce future landfill use.

Furnishings shall be selected from manufacturers that utilize the following criteria:

- ANSI/BIFMA e3 Furniture Sustainability Standard or third party certified to meet the same standards criteria.
- GREENGUARD or Scientific Certification Systems (SCS) Certified or industry-independent, third-party testing for indoor air quality certification and demonstrates compliance to ANSI/BIFMA criteria for low-emitting furniture.
- Scientific Certification Systems (SCS) Certified
- Cradle to Cradle Certified (c2c)

Styles and Types – FF&E:

The furniture style for the building will be transitional style with clean design lines and simple forms that function efficiently. The criterion for the interior furnishings included providing product types and layouts that are designed for the maximum space efficiency to accommodate teaming and solitary work efforts. The furnishings are value oriented with ergonomic features, integrated technology, modular construction, and finishes proven in longevity.

Interior Furnishings Standards – FF&E:

The furnishings must be durable, easy to reconfigure, have a limited kit of parts to manage and easily respond to change. The furnishings must support the users work and health with balanced lighting, ergonomic support, and environmentally sensitive materials for a non-toxic, productive environment.

Of equal importance to the function of the furnishings, ergonomic support and features that encourage a healthy work environment to the users is critical. The furnishings size and adjustability features will accommodate a minimum of 95% of the facility population size. Other healthy / ergonomic furniture features include:

- Task lighting with glare reduction adjustability, providing light in task areas to avoid eye strain.
- Seating for all users with easily adjustable mechanism for height, arms, and back, breathable fabric for comfort and seat pan front edges that will not cut off circulation while sitting.
- Selecting furnishings from manufacturers that utilize green manufacturing processes and produce products that are Green Guard Certified, with recycled content materials. When possible, furnishings will be provided that achieve the "Cradle to Cradle" environmental status to reduce future landfill use.

Furnishings to be provided include panel-based workstations, freestanding desks, task and guest seating, task lighting, file storage, conference tables and seating, waste receptacles, and break room tables and chairs.

Systems panel furniture will have panels with tackable panels on the interior. Systems workstations will be fed from power and data poles. Power and data receptacles will be supplied at the worksurface for easy plug-in. Worksurfaces will be laminate.
